

GHANASHYAMA MAHUNTA

Cloud & DevOps Engineer | AWS | Linux | Docker | Kubernetes | CI/CD

Hyderabad, India | Open to Relocate | Available Immediately

+91 7847808191 | ghanshyammahunta@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Entry-level Cloud & DevOps Engineer (BCA, AWS Certified Cloud Practitioner) with a DevOps Engineer internship at PearlThoughts and 6 months of DevOps with AWS training. Built CI/CD pipelines with Jenkins, GitHub Actions and AWS CodePipeline, provisioned infrastructure with Terraform, and deployed containerized workloads on Kubernetes and AWS with security scanning built in. Seeking Cloud, DevOps or SRE roles focused on automation, scalability and reliable deployments.

TECHNICAL SKILLS

CI/CD: GitHub Actions, Jenkins, AWS CodePipeline, CodeBuild, CodeDeploy

Containers & Monitoring: Docker, Kubernetes, Prometheus, Grafana, AWS CloudWatch

IaC & Automation: Terraform, Ansible, Bash scripting

AWS: EC2, S3, RDS (Multi-AZ), VPC, IAM, ALB, Auto Scaling, CloudFront, Lambda, DynamoDB, API Gateway, CloudWatch

Security: SonarQube, Trivy, OWASP Dependency-Check, IAM least privilege

Other: Linux, Git/GitHub, GCP (core services), Networking (TCP/IP, DNS, HTTP/HTTPS, subnetting, load balancing)

EXPERIENCE

DevOps Engineer Intern | PearlThoughts | Hyderabad (Remote) *Aug 2026 – Sep 2026 (1-month internship)*

- Automated build and deployment workflows using **GitHub Actions** as part of a remote engineering team.
- Containerized applications with **Docker** and deployed them on **AWS EC2**, with hands-on use of AWS and GCP services.
- Worked with a **Terraform** module to provision cloud infrastructure, and used **Ansible** for configuration management.
- Wrote **Bash** scripts to automate repetitive tasks on Linux, and used **AWS CloudWatch** to monitor application and server activity.

PROJECTS

DevSecOps CI/CD Pipeline Using Jenkins (Training Project)

Dec 2025 – Jan 2026

Jenkins, Docker, Kubernetes, GitHub, AWS EC2, SonarQube, Trivy, OWASP

- Built a multi-stage Jenkins + GitHub pipeline covering build, test, security scanning and deployment, reducing manual deployment effort by 60%.
- Integrated **SonarQube**, **OWASP Dependency-Check** and **Trivy** to catch code-quality and vulnerability issues early in the pipeline.
- Automated Docker image build and release workflows targeting a Kubernetes cluster.

Automated CI/CD Deployment of a Scalable 3-Tier Application on AWS (Training Project)

Jan – Feb 2026

CodePipeline, CodeBuild, CodeDeploy, EC2, ALB, Auto Scaling, RDS MySQL, S3, IAM, VPC, CloudFront, GitHub

- Built a CI/CD pipeline connecting GitHub to AWS CodePipeline, CodeBuild and CodeDeploy for continuous integration on every commit.
- Designed a highly available 3-tier architecture across two Availability Zones with ALB, Auto Scaling (2–6 instances) and Multi-AZ RDS MySQL.
- Applied VPC subnet separation and least-privilege IAM roles and security groups, aligned with the AWS Well-Architected Framework; served static content via CloudFront and S3.

CERTIFICATIONS & TRAINING

- AWS Certified Cloud Practitioner** – Amazon Web Services
- DevOps with AWS** – 6-month training, Naresh IT, Hyderabad (Aug 2025 – Feb 2026)
- Introduction to Kubernetes (LFS158)** – Linux Foundation / edX (course completion)

EDUCATION

Bachelor of Computer Applications (BCA) | CGPA: 8.9/10

Aug 2022 – May 2025

Science College (Autonomous), Hinjilicut | Berhampur University, Odisha
